Fall and Spring Seasons 1944-1945

Terms—Rules

First: No Plant order is filled for less than \$1.50, unless you pay 25 cents extra for packing and postage. No seed order is filled for less than 25 cents.

Second: We pay the postage on all mail orders, but plants on which we pay the postage are of necessity smaller than those upon which you are willing to pay the postage or have sent by express. You understand that we cannot pay out the biggest part of our profit for postage. Therefore, if you are willing to pay the express charges, or will pay 10% on your order towards the postage, we gladly send you larger plants, except in cases of rare and expensive plants or bulbs, of which you can expect only small divisions at the best.

Third: We do not open accounts—we are too busy, and bookkeeping is too expensive. Neither do we send plants or seeds C. O. D. unless one-half is paid with the order.

Send Money Order, Express Order, Check or Draft.

If you send currency, have your letter registered; we assume no responsibility if money is sent in an ordinary letter.

If you must send stamps, please do not send more than 50c worth.

Fourth: All stock is offered subject to being unsold on receipt of order; if stock ordered is not available, unless you have named some substitutes, we will return your money—we do not substitute.

Fifth: We guarantee our plants and seeds to be true to name; if through some error on our part the plant turns out otherwise, we will replace it free of charge; this, however, does not apply to seedlings that have not bloomed yet and of which certain colors are ordered; we can give no warranty, express or implied, that the progeny will be true to the parent color; this applies particularly to Delphiniums, Columbines, Lupins and Oriental Poppies.

Sixth: The choice flower seeds offered herein are absolutely good and fresh and with reasonable care and skill on your part a large germination should be obtained in every case, with some exceptions, however, of a few notable bad germinators. Some seeds lie in the ground for a long time, some all Winter, and then come up strong in the Spring. With good care, all flower seeds are as good in the Spring as they were in the fall. Some people have the notion that Delphinium seeds lose all their strength by Spring. This is absolutely not the case; these seeds, if sown with ordinary care, are just as good for Spring sowing as they were in the Fall, the only difference being that instead of germinating in 10 days it might take them 3 or 4 weeks. We sow many ounces as late as April 15th; 30 days later we have a beautiful stand of thousands of seedlings, the long rows looking like a wide green ribbon.

Seventh: We are not responsible for delays in the mails, and particularly not if the stock is held up through Quarantine regulations. If you are so unfortunate as to live in a State that has stringent plant laws and where plants are sent, after being received at your Post Office, to a central inspection point, often many miles away, then opened up, handled, perhaps fumigated, and after such treatment carelessly re-packed and returned to your Post Office, often causing days of delays. We would advise shipments by express.

We want to thank all customers for their patronage in the past. On the basis of service and satisfaction we solicit your orders, large or small.

ATTENTION—THIS CATALOG CANCELS ALL PREVIOUS CATALOGS AND LISTS

Please, DO NOT order from any previous catalog, not even of last season's. It only causes confusion and delays.

PLEASE DO NOTE

As only such seeds as germinate well in our own establishment are supplied to customers, we will not and cannot accept responsibility for failure in the hands of others whose management, lack of equipment or lack of knowledge, may unconsciously be the cause of non-success.

Introduction

In compiling our 1944-45 Seed List, our aim has been to offer seeds and plants worth sowing and growing. Plants and seeds with high sounding names, unproven NOVELTIES, many of which have only little merit, we have rigidly excluded.

We do not believe in listing seeds or plants just because they are novelties or rare, hoping to sell them by omitting to say they are also deplorably unattractive and dull. We have made all descriptions as just and accurately as possible.

When we say that a flower is beautiful, we mean that we really do think it beautiful; and when we say that the color is blue or pink, we mean that it really is blue or pink.

HARDY PERENNIAL FLOWER SEEDS

For Spring or Summer Sowing

ALL FLOWER SEEDS SENT POSTPAID

PLEASE DO NOTE!

 All seed packs contain a liberal amount of seeds. If you have a large garden, the most economical way to buy seeds is in bulk: 1/16 oz. and up, where so quoted.

In comparing competitive prices be assured that you get fewer and often inferior seed at the lower prices.

To grow high grade seeds takes more care and skill, and costs more money, but it certainly pays in the end to buy only such seed. This refers particularly to Delphinium, Columbine, Primroses, Pansies, Sweet Peas and Zinnias.

Fresh the seeds must be, of course, and be assured, ours are. Buying old or inferior seed is a waste of money and time.

DELPHINIUMS

 **PLEASE NOTE:** The 1944 Delphinium Seed Crop will be ready last of July to August first; plenty of time to get strong seedlings before winter comes.

This seed will be just as good for sowing in the Spring, only with this difference: In the fall the seeds will or should germinate in 10 to 14 days while in the spring it takes fully three weeks. We sow our seeds in the spring about May first, for fall seedlings, and many of these small seedlings will bloom in September in the seed rows, four to five months from seeds to blossoms! The following spring they will have developed into husky little clumps. Such is PUDOR'S PRIZE WINNER STRAIN. There is none better.

PUDOR'S PEDIGREAED PRIZE WINNER STRAIN. The choicest seed you can obtain.

Mostly double 2 $\frac{1}{4}$ to 3 inch blooms; shades running from sky blue to the deepest blue; mostly with pinkish fillings. Height 6 to 8 feet. Prize winners for many of our customers in many cities year after year. In choicest **MIXTURE**, per **pkt.** (about 200 seeds plus) \$1.00, $\frac{1}{2}$ **pkt.** 60c; 1/16 oz. (about 600 seeds) \$2.00.

PUDOR'S PRIVATE STRAIN No. 55/66. It was originally a cross between a **PURE WHITE** and a **MOTHER OF PEARL** color. Throws most extraordinary beautiful flowers in shades of double blues and pinks, purples and violets, with now and then a beautiful white. This is our pet strain for surprises. Per **pkt.** \$1.00; $\frac{1}{2}$ **pkt.** 60c; 1/16 oz. \$2.50.

A Lovely New Seeding from our 55/66 Strain. A Beautiful all-cobalt blue. Note the fluted and ruffled flower petals.

GENERAL MIXTURE FIELD RUN PRIZE WINNER STRAIN. You will raise many beautiful plants from this mixture. We grow no poor specimens in our field. **Pkt.** 50c, 1/16 oz. \$1.00

PUDOR'S DREAM. Still one of the finest Delphiniums we have. Everyone marvels at the great beauty of a well grown clump. It is an early bloomer. The 3½ inch blossoms on a perfect stalk are very double of an exquisite shade of azure blue and pink with a small white bee or center. 1 pkt. (approx. 200 seeds) \$1.25, ½ pkt. 65c.

A FLOWER OF PUDOR'S "PRIZE WINNER", "DREAM"

Life size, 3 inches.

Putting a silver dollar over the picture will
make you realize the size of the flower.

PUDOR'S BLACK-VELVET-EYED WHITE DELPHINIUMS. After 2 years of careful rogueing and selecting plants, we have now plants that will produce a high percentage of large black-eyed double whites; many of our breeders have very large, coal-black glowing centers. All the plants are strong and vigorous and are true perennials, not apt to die after their first blooming season. You will get a few blues in a lot and all the whites will not have black bees. Please remember this when your plants begin to bloom. Owing to a general Delphinium seed crop failure the past year, we do not have a large quantity of seed. Per pkt. \$1.50, ½ pkt. 80c.

Independence, Ohio.

I bought 3 dozen seedlings from your white plants, and 3 dozen of your Black-Velvet-Eyed seedlings and right now they are marvels of beauty. One white has individual florets 3 inches in diameter and looks like White Wonder as pictured in your catalog, with this exception: it has a nice golden brown bee. There are several lovely Black-Velvet-Eyed whites, a large white single and a large double white which has the inner petals (next to the bee) edged with a narrow border of black. There are also many other outstanding whites and in the 6 dozen plants all are white except four and these are double and such beauties, I would not sell them for \$1.00 each. According to another price list I have on white delphinium plants, I have plants that are worth many dollars, and to think the 6 dozen cost only \$5.25. Black-Velvet-Eyed whites are marked at \$12.00 per plant.

W. R. T.

SHAKUNTALA (Indian Princess). Our new very handsome hybrid, producing 4-ft. flower stalks with individual blossom stems 6 to 9 inches long, a most remarkable natural hybrid. Per pkt. (containing some 100 seeds) \$1.00. All seedlings will not breed true to the parent plant, but will be outstanding. The flowers are extremely double and triple; more like a rose, and no "bee" is visible. The whole center is filled with crinkly petals, the outer ones being of a beautiful clear blue color, the others a pleasing mauve. See photograph from life on back cover.

PLEASE DO NOTE! As only such seeds as germinate well in our own establishment are supplied to customers, we will not and cannot accept responsibility for failure in the hands of others whose management, lack of equipment or lack of knowledge, may unconsciously be the cause of non-success.

☞ All seed packs contain a liberal amount of seeds. If you have a large garden, the most economical way to buy seeds is in bulk, 1/16 oz. and up, where so quoted.

In comparing competitive prices, be assured that you get fewer and often inferior seed at the lower prices.

To grow high grade seeds take more care and skill and costs more money, and it certainly pays in the end to buy only such seed. This refers particularly to Delphinium, Columbine, Primroses, Pansies, Sweet Peas, and Zinnias.

Fresh the seeds must be, of course, and be assured, ours are. Buying old or inferior seed is a waste of money and time.

This new type will be a great boon to amateur gardeners throughout the country and particularly in warmer climates and where the hot summer weather plays havoc with the late and early flowering type of Spencers. Enthusiastic reports have come from many parts of the country. In California this new type of "SPRING FLOWERING" Sweet Peas is creating a sensation. There are better shades than ever seen in the early flowering or late flowering types and the self colors are much clearer and brighter. The blooming season is between the early and the late types. Stems are longer and the flowers last longer.

A fine MIXTURE of the 12 BEST "SPRING FLOWERING" SWEET PEAS. Per pkt. 25c; Per oz. 70c; ½ oz. 40c. (1 ounce to 25 foot row.)

CULTURE OF SWEET PEAS

First and most important, plant as early in the spring as the conditions will permit. Seeds should be sown at the rate of 1 oz. to 25 feet. Make a trench about 3 or 4 inches deep, planting seeds in the bottom about 2 inches deep, pressing the soil firmly. After the plants are well up, thin to 4 or 5 inches apart and draw the soil around them until the trench is filled above the level. This gives a depth to the roots, preserving the moisture. Keep the ground well worked and water if needed, an occasional soaking down being better than a daily sprinkling. Keep the flowers cut close.

Subject to crop, we again offer this grandest and sweetest of all Sweetcorn on the market.

Aunt Mary's Sweet Corn

Seed is scarce. ORDER EARLY! There is never enough to fill late orders.

Originated in Ohio, it is supposed to have been given to some person named "Aunt Mary" by the Indians, and handed down through the family for many years and was again put on the market some three years ago by a Mr. Bonnewitz. It is taking the country by storm and not enough praise can be given it.

Never was sweet corn that tasted as sweet. It will stay in good condition for table use for two or three weeks. It stays in milk so long that natural ripening is impossible; ears that were ready for table use in October were still in milk when hard frosts killed the plants in November.

BY ALL MEANS GIVE THIS SWEET CORN A TRIAL THIS YEAR AND YOU WILL COME BACK FOR MORE NEXT YEAR. Make your first planting during May—two weeks apart; make another one the second week in June, another the last week in June, and the last planting the first week in July, and this will furnish you sweet green ears in early October.

We have had reports from customers having the ears for table use for Thanksgiving. They had made late plantings of seed in June and July.

PRICE OF SEED. Enough for 50 to 75 hills 25c. 3 PACKS for 60c. $\frac{1}{2}$ pound will produce approximately 500 plants and costs 70c, **postpaid**, West of the Rocky Mountains, 75c **postpaid**, East of the Rocky Mountains.

SPECIAL PRICE BY THE POUND. West of the Rockies, \$1.15 **postpaid**. \$1.25 East of the Rockies.

BY EXPRESS, charges collect \$1.00 per pound, anywhere.

 **Hundreds of customers in all sections of the U. S. feel likewise.** 

Concord, North Carolina, January 11, 1944

Our "Aunt Mary's Sweet Corn" was marvelous last year. Enjoying it now canned. Tastes most like fresh.

Plainview, Nebraska, January 14, 1944

I just want to say we never enjoyed or raised such a surprise as "Aunt Mary's Sweet Corn." We had it very dry here but it didn't seem to hurt it and for two full months we had corn from one planting 'till frost killed it. I tell everyone about it.

Los Angeles, California, February, 1944

We had some of "Aunt Mary's Sweet Corn" last year and it was the best corn we ever ate. It is absolutely the sweetest and tenderest sweet corn ever grown.

Elmire, New York, February 26, 1944

I have grown "Aunt Mary's Sweet Corn" for the last two seasons and have never eaten better.

Bellingham, Washington, March 14, 1944

Enclosed is a check for one-half pound of Aunt Mary's Sweet Corn. It is a grand corn. Had our last meal on October 30th, and was it good!

PERENNIAL PLANTS

We have decided that, owing to adverse conditions caused by the war, we will discontinue the retailing of all perennial plants, including seedlings of all kind, until conditions, and particularly labor conditions, become normal once more. Only time can tell when that will be.

This will not affect our Iris and bulb business, nor of course, our seed business. We shall continue to grow and sell these as heretofore and will devote our time and best efforts to the betterment of our Delphiniums and Iris, and serve you with the very best and highest grade of flower seeds and bulbs as heretofore. We are continually expanding our Iris collection and have added this season many of the finest novelties as you will notice by looking over our list.

All orders for Delphinium seedlings and plants which we have now on our files for early fall delivery will all be filled in due course and the Delphinium seedlings which we will have left over next spring will be gladly disposed of locally and in the states of Washington and Oregon (not further away), at our usual prices. There will not be many.

PRICES will be 10c, 15c and 25c each, according to prices; quality the same—the best.

No orders accepted for less than \$1.50, and in DOZEN lots only, all of one size; please, don't mix the sizes to make up a dozen plants. We can't do it. Locally called for, 10% off.

CHRYSANTHEMUMS

Owing to war conditions, shortage of labor, etc., it is very likely that we will not grow and sell Chrysanthemum plants in the Spring. Should conditions become more favorable by February, we will issue a separate Chrysanthemum List by March 1st and mail you a copy. Plants will not be ready until May, should we grow them, and then only for customers in our state, Oregon and Idaho. Not further away.

JAPANESE IRIS KAEMPFERI (The Former Japanese Iris)

The month of August and early September is probably the best time for the transplanting of these Iris. They may also be planted in the early spring, up to April 30th. After that they have made too much of a long leaf growth and they are not apt to recover for blooming that same season. We will not send them out after May 1st, unless you want to take the chance and have them sent by Express, charges collect. May 10th is the deadline in an average year.

FERTILIZER. We use well-rotted cow, chicken or rabbit manure, and for acidity, small quantities of aluminum sulphate tech. The richer and more moist the ground, the bigger the blossoms; you can't get size in poor soil and without lots of water.

WE OFFER BOTH FOR FALL AND SPRING PLANTING

**A CHOICE LIST OF NEW AND GOOD OLD BEARED IRIS
(Germanica)**

**DELIVERY ONLY FROM JULY FIRST TO NOVEMBER FIRST
(NO SPRING SALES)**

Prices in this Iris List supplant those in all previous price lists. Please do not order from any previous catalog!

CANADIAN CUSTOMERS will please add 15c per pound to their order and will have to obtain plant permit from the Plant Bureau at Ottawa before shipment can be made. For large orders we advise Express Shipments.

IN THE UNITED STATES IRIS ORDERS AMOUNTING TO \$1.50 OR LESS ARE NOT PREPAID AND MUST INCLUDE 25c POSTAGE WHEN ORDER IS GIVEN.

On large orders we advise Express Shipment, the customer paying the forwarding charges, in which case we will send extra plants free of charge to make up part of the forwarding charges.

We cannot too strongly recommend July and August planting for Iris. WE CANNOT SHIP BEFORE JULY 1 NOR AFTER NOVEMBER 1.

NOTICE TO LOCAL CUSTOMERS: If you expect to come to the gardens for Iris plants on Sunday, we request that you call us on the telephone or send in your order during the week so we can dig the rhizomes Saturday. We will not always be able to dig Iris on Sundays.

Prices for Iris as quoted below are for one new plant or one rhizome which will bloom next season and on which the new side shoots or "babies" will develop before winter sets in; this will be your increase for next year. In July these new eyes are very small but will grow rapidly during August, September and October.

Consequently, in July, the new rhizomes weigh very little, but each month thereafter they increase rapidly in weight until in October the plants of vigorous sorts will weigh as much as one pound, which means two pounds when packed; the postage on such a plant would be 15 cents to the Central States and 25 cents to the East. So you can readily figure out that we could not afford to pay the postage on any variety quoted at 25 to 50 cents. So please note carefully:

PRICES FOR IRIS AS QUOTED BELOW INCLUDE THE POSTAGE TO ANY PLACE IN THE UNITED STATES—BUT ONLY FOR JULY DELIVERY WHEN THE RHIZOMES ARE SMALLEST AND LIGHTEST IN WEIGHT.

For August delivery, please add the following postage to the net prices quoted:

Number Ordered	West of the Rockies	Central States	Southern & Eastern States
4	10c	18c	25c
6	13c	24c	35c
10	17c	35c	55c
11 to 15	25c	45c	75c

Over 15 plants by Express, Charges Collect

For month of September delivery, please add the following postage to the prices quoted:

Number Ordered	West of the Rockies	Central States	Southern & Eastern States
4	15c	24c	35c
6	22c	36c	55c
10	30c	55c	85c
11 to 15	45c	80c	\$1.25

Over 15 plants by Express, Charges Collect

For the month of October and onwards, when most of the plants are really big clumps with their "children" grown up, we recommend Express shipments only, which will not be prepaid. They can be sent by Parcel Post if you choose so, but the full postage has to be forwarded with the order.

[WE CANNOT FILL IRIS ORDERS FOR LESS THAN \$1.50 UNLESS YOU WILL PAY 25c EXTRA FOR PACKING AND POSTAGE.]

WHEN IRIS ARE SENT BY EXPRESS, THE PURCHASER PAYING THE FORWARDING CHARGES, WHICH ARE VERY REASONABLE, IN SOME CASES NOT MORE THAN PARCEL POST OR ONLY A LITTLE MORE, WE WILL SEND YOU TWO EXTRA PLANTS IN THE 25-CENT CLASS—YOUR CHOOSING, PROVIDED YOU BUY AT LEAST 10 IRIS.

ALL IRIS PRICED 25c EACH, ARE 3 FOR 60, DURING JULY ONLY, but must be of the same variety. YOU CANNOT ORDER THREE DIFFERENT PLANTS FOR 60c.

PRESERVE THIS CATALOG FOR YOUR 1945 SPRING ORDERS

Owing to war conditions we will not publish and mail a separate Spring Catalog in 1945.

Please preserve this catalog for your 1945 Spring orders. Fresh seeds, both annuals and perennials from the 1944 seeds crop, will be ready in the early fall. Some, such as Delphiniums, Lupins and Columbine, by August 1st.

When January comes, and you find that you have misplaced our Catalog, don't hesitate to ask us for another one, but we won't have much of a surplus left and printing a second edition costs money and might even be out of the question. So won't you please preserve this Catalog and not throw it away or lose it? Thank you.
